**What grade you expect to receive:**

I would like to receive grade between 105-115.
Why you expect to get that grade:
I devoted 30 hours every week on this portfolio, and I really want to do better in website design.
I use three different ways to show my navigation bar. And I am trying to make each of my website look a little bit different from each other which can show how many efforts I have put in this process.
I have a nice photo gallery and in the contact form, and I add a video I filmed by myself as well.

**A write-up of your "extras":**

I use some sag animation to make my header look interesting.
I use some javascript.
I have three different navigation bars.

**PLUS:**

There is an error when I try to upload my documents to the server. Below is the address of all my documents:
https://umich.box.com/s/3qgzl96mtipz7gbi8u1862lkpt48cen0

This one if the compiled version of my code when I try to delete some big files, however still failed to upload to the server.
